PeopleSoft Integration Tools Part 1

Course Number: PSF150

Duration: 4 days

Course Description

This course introduces participants to the various PeopleSoft technologies available for integrating with other PeopleSoft systems and third-party systems. Participants will take an in-depth look at PeopleSoft Integration Broker and practice configuring and administering the Integration Network using the Integration Network WorkCenter. Hands-on activities will allow participants to send and receive asynchronous and synchronous service operations as well as monitor and troubleshoot integrations. The course also covers providing and consuming web services.

This course was developed by an Oracle expert. For additional PeopleSoft topics please visit: Oracle PeopleSoft Training Courses
