Course Number: ZE531G-SPVC

Duration: 2 days

Overview

Course Description

This IBM Self-Paced Virtual Class (SPVC) includes:

- PDF course guide available to attendee during and after course
- Lab environment where students can work through demonstrations and exercises at their own pace

In this course, you manage the DataPower Gateway by using various management interfaces, such as the CLI, SOAP, and the WebGUI. You configure DataPower Gateway service resources. You examine the services supported on the DataPower Gateway. You create new user accounts, user groups, and domains in the DataPower Gateway interface. You troubleshoot the DataPower Gateway. You secure connections by using cryptographic tools and SSL. Finally, you capture information from DataPower events with logging.

Skills Gained

- Describe the DataPower deployment environments
- Set up the DataPower Gateway

- Manage the DataPower Gateway
- Explain DataPower administration
- Create and manage requests with DataPower Gateway
- Understand DataPower services
- Configure software access
- Troubleshoot and debug services
- Configure the DataPower Gateway security
- Understand logging and log targets

Who Can Benefit

This course is intended for administrators of the IBM DataPowerGateway product.

Prerequisites

null

Audience
