IBM - Guardium Data Protection: Troubleshooting

Course Number: 8G935XG-WBT

Duration: 0.25 days

Course Description

This IBM Web-Based Training (WBT) is Self-Paced and includes:
- Instructional content available online for duration of course
- Visuals without hands-on lab exercises

In today?s data-driven world, maintaining the health and performance of your Guardium Data Protection environment is critical. What happens when you have issues with Guardium Data Protection? Do you know how to gather data about problems that affect your Central Managers, Collectors, and S-TAP and GIM agents? Is your database getting full? Can you gather the files necessary to diagnose severe S-TAP agent issues? This course is designed for Guardium Data Protection administrators who are ready to elevate their troubleshooting skills and ensure the resilience of their data security infrastructure.

Skills Gained

- Use the Guardium Data Protection user interface and command line interface to troubleshoot Guardium Data Protection health issues
- Collect files necessary to troubleshoot high severity issues
