IBM - MaaS360 integrations to enhance security posture

Course Number: 8I101XG-SPVC

Duration: 0.25 days

Course Description

This IBM Self-Paced Virtual Class (SPVC) includes:
- PDF course guide available to attendee during and after course
- Lab environment where students can work through demonstrations and exercises at their own pace

Have you already deployed a unified endpoint management solution into your environment but want to enhance the security posture for admins, users, and devices? This course describes a series of security lifecycle integrations between MaaS360 and other portfolio and third-party offerings. Learners will see how to perform a directory sync with Microsoft Entra ID to automatically import users and groups from an enterprise directory to MaaS360. Enhanced access to multiple services for administrators is enabled with IBM Security Verify, which provides SAML-based authentication to eliminate multiple password entries. Conditional access is demonstrated to show how trusted users and groups from compliant and managed devices can gain access to Microsoft-approved apps and services like Outlook. MaaS360 integration with QRadar SIEM demonstrates how log source files from MaaS360 can be imported into QRadar to monitor for anomolies (malicious emails) and out of compliance events. And finally, MaaS360 integrates with mobile threat detection capabilities to enhance security detection, prevention and response on corporate and personally owned mobile endpoints.

Skills Gained

- Describe steps to integrate IBM MaaS360 and Entra ID to automatically imports users into MaaS360 and then securely connect to enterprise services like Outlook.

- Describe steps to integrate IBM MaaS360 enable single sign on.
- Describe steps to integrate IBM MaaS360 to monitor for potential threats and to take the appropriate remediation steps.
- Learn how to upgrade MaaS360 with mobile threat detection to improve detection prevention and response.

Who Can Benefit

System administrators

Prerequisites

null

Course Details

Outline

- Describe steps to integrate IBM MaaS360 and Entra ID to automatically imports users into MaaS360 and then securely connect to enterprise services like Outlook.
- Describe steps to integrate IBM MaaS360 enable single sign on.
- Describe steps to integrate IBM MaaS360 to monitor for potential threats and to take the appropriate remediation steps.
- Learn how to upgrade MaaS360 with mobile threat detection to improve detection prevention and response.
