Duration: 2 days

Overview

Course Description

The Veritas Alta View (Data Protection): Administration course is designed for data protection professionals who need to use a secure management platform delivered as a service that combines data from all Veritas-managed domains into a single, aggregated view. This course discusses configuring, using, managing, and monitoring Veritas Alta View to easily manage all your critical data protection requirements at any scale across hybrid cloud, multi-cloud, and on-premises environments.

The course enables you to gain the necessary fundamental and advanced skills that are required to leverage the features and functionality within Veritas Alta View.

Skills Gained

After completing this course, you will be able to:

- List the features of Veritas Alta View.
- Enumerate the security features of Veritas Alta View.
- Identify the functionality of the Veritas Alta View user interface.

- View system tasks, system events, and audit events.
- Add new users to Veritas Alta View.
- Assign role permissions and scope to the users.
- Understand the Cyber resiliency features of Alta View.
- Understand how Alta Copilot helps to simplify data management.
- List prerequisites to add a NetBackup domain.
- Add and manage a NetBackup domain in Veritas Alta View.
- Explain asset management and the types of assets based on the workloads.

- Explain the NetBackup recovery process in Veritas Alta View.
- List the asset types supported for NetBackup recovery.
- Perform regular recovery of the assets.
- Perform orchestration activities in Veritas Alta View.
- Perform basic operations on recovery groups and recover a recovery group.
- Describe the blueprint workflow and operations.
- Create customized dashboards.
- List the types of report groups available in Veritas Alta reports.

Demonstrations

This course includes demonstrations that enable you to learn new skills and transfer those skills into your working environment.

Audience

Course Details

Introducing Veritas Alta View

- Veritas Alta View: Overview
- Veritas Alta View: Features
- Veritas Alta View: Security Features

Working with the Veritas Alta View User interface

- Veritas Alta View: User Interface
- Demo: Navigating and Understanding the Alta View User Interface

Managing Users and Roles

- Managing Users in Veritas Alta View
- Managing Roles in Veritas Alta View
- Viewing Events in Veritas Alta View

Understanding Cyber Resiliency and AI Features in Veritas Alta View

- Cyber Resiliency Feature in Veritas Alta View
- Alta Copilot in Veritas Alta View
- Demo: Working with Alta Copilot
- Demo: Simplifying Data Management Using Alta Copilot

Configuring NetBackup in Veritas Alta View

- NetBackup Domains: Overview
- Adding NetBackup Domains
- Managing NetBackup Domains
- Demo: Adding and Managing NetBackup Domains in the Veritas Alta View User Interface

Managing Assets

- Asset Management: Overview
- Asset Management: Operations

Protecting Data using Veritas Alta View

- Working with NetBackup Policies in Veritas Alta View
- Exploring the NetBackup Policies Page
- Subscribing to a Protection Plan in Veritas Alta View
- Exploring the Storage Lifecycle Policies (SLP) Page

Recovering Data using Veritas Alta View

- Performing NetBackup Recovery in Veritas Alta View
- Accessing the NetBackup Recovery Page
- Performing Recovery Orchestration
- Working with Recovery Groups
- Creating and Managing Blueprints

Working with Reports

- Generating and Managing Veritas Alta View Reports
- Demo: Using Templates to Create Custom Reports in Veritas Alta View
