Lean Portfolio Management Certification

Course Number: LPM-CERT

Duration: 2 days

Course Description

Your journey begins with the two-day course, where you'll engage in exercises, group discussions, and real-world applications of LPM practices. After completing the course, you'll gain access to the certification exam. Pass the exam and receive a digital badge that validates your skills and connects you with a global network of certified Lean Portfolio Management experts.

- Earn your SAFe Lean Portfolio Manager (LPM) certification and build credibility as an enterprise agile leader.
- Learn how to apply Lean thinking to budgeting, governance, and portfolio operations.
- Gain the skills to organize around value, align strategic planning, and guide Agile execution across the organization.

Skills Gained

Aligning Strategy with Execution: Learn how to connect portfolio initiatives directly to business strategy and keep investments focused on the most important outcomes. **Lean Budgeting and Portfolio Flow**: Explore how to fund value streams, establish guardrails, and manage epics using portfolio kanban to support continuous, lean flow. **Running Agile Portfolio Operations**: Gain practical tools for coordinating across value streams, managing change, and supporting excellence through agile PMOs and communities of practice. **Designing a Plan for LPM Adoption**: Capture your current state, define your portfolio vision, and build a step-by-step plan to bring Lean Portfolio Management to life in your organization.

Who Can Benefit

Our Lean Portfolio Management (LPM) course is designed for leaders who need to manage an agile approach to portfolio planning, funding, and operations that bridges the gap between vision and delivery. This course gives you the tools to lead with clarity and agility, whether you're already practicing SAFe or just starting to scale.

- Executive Leaders
- Enterprise Architects
- Product Management Leaders
- PMO Leaders
- Agile Coaches
- SAFe Practice Consultants
