Course Number: U5WM104G

Duration: 1 days

Overview

Course Description

This 1-day course focuses on configuration of project areas and global settings. You will learn best practices, possibilities and gain hands-on experience with how projects can be effectively tailored, managed, and maintained.

- This course also applies to IBM Rational Team Concert 6 (RTC) users.

Skills Gained

After completing this course, participants should be able to:

- Define work item types, attributes, categories
- Adjust predefined queries
- Define workflows
- Configure work item presentations

- Configure roles and access rights
- Adjust behavior and constraint settings
- Manage link types
- Define dashboard templates
- Work with project templates
- Use a master project

Who Can Benefit

This course is for:

- Senior product users
- Administrators and those responsible for Project Areas
- Release Managers

Prerequisites

These courses or equivalent knowledge is highly recommended:
