Duration: 1 days

Overview

Course Description

This 1-day course teaches testing professionals how to perform management and live reporting with IBM Engineering Test Management. One learns how key test assets are organized, how to manage reviews, how to plan and assign test execution, and how to use filters and dashboards for monitoring status.

Skills Gained

After completing this course, participants should be able to:

- Explain key concepts and terminology
- Describe the Global Configuration capability
- Manage test plans
- Define and perform reviews for test assets
- Manage test cases

- Create execution records
- Assign, filter and run execution records
- Use dashboards and widgets for monitoring

Who Can Benefit

This introductory course is for:

- Test Managers
- Quality Managers
- Team Leaders
- Anyone wanting a good understanding how test assets are organized and managed

Prerequisites

It would be helpful to have skills or experience:

- A general understanding of testing methodology

Lab Environment

- IBM Engineering Test Management 7

Audience
