Course Number: U5TM102G

Duration: 1 days

Overview

Course Description

This 1-day course teaches testing professionals how to perform test implementation and execution with IBM Engineering Test Management. One learns how to enhance test scripts using traceability links, keywords, execution variables, test data and integrate with automation scripts.

Skills Gained

After completing this course, participants should be able to:

- Create and analyze traceability links
- Create test suites
- Use Test Suite Execution Records
- Integrate with automation scripts
- Create and utilize keywords

- Use test data files
- Customize dashboards
- Create custom reports using Report Builder

Who Can Benefit

This advanced course is for:

- Testers
- Test Analysts
- Those performing verification or validation
- Those wanting to understand how information is organized in the product and how test scripts are implemented and executed

Prerequisites

You should have:

- Understanding of manual test development and execution
- Completed the IBM Engineering Test Management 7 Introduction course or have equivalent knowledge

Lab Environment

- IBM Engineering Test Management 7

Learning Path

- IBM Engineering Test Management 7 Introduction
- IBM Engineering Test Management 7 Advanced

Audience

Course Details

Topics

- About this course
- Key concepts and terminology
- Traceability links
- Test Suites
- Automation
- Keywords
- Execution variables

- Test data files
- Dashboards
- Reporting
