Course Number: U5I2101G

Duration: 3 days

Overview

Course Description

This 3-day course provides students with the skills needed to effectively create, search, analyse, import and disseminate data using i2 Analyst's Notebook ('ANB').

- This course is also applicable for users of i2 Analyst's Notebook 9.0 and above.

Skills Gained

- Produce various Chart types that include Entities, Attributes, Links and Cards
- Show how to display various Time Zones on a Chart
- Change the representation of Chart items to support analysis
- Tailor ANB for an organization by creating and managing Entities, Links and Attributes
- Utilise the basic functions to search and interrogate Charts to identify key Entities to support analysis and identify discrepancies
- Apply various Association and Temporal layouts to change the format of the Charts to identify patterns and use more structured layouts

- Create basic Import Specifications to create detailed Association and Temporal Charts using data from Excel / csv files
- Merge charts being aware of the behaviours of Entities and Link Types
- Produce Presentation Charts to highlight key Entities and Networks
- Format Charts for dissemination considering Cover Sheets, Page Setup and Redaction of sensitive information

Who Can Benefit

This course is suitable for anyone wishing to learn how to use the basic functions of the software.

Prerequisites

Students must be reasonably proficient with Microsoft Windows, Excel and Word.

Lab Environment

- Based on i2 Analyst's Notebook 9.4

Audience
